MYTHBUSTERS MOVES TO SUNDAYS BEGINNING MARCH 25:
NEW EPISODES KICK OFF WITH A DARING ESCAPE FROM A DESERTED ISLAND
USING ONLY – YOU GUESSED IT – DUCT TAPE

Beginning March 25, **MYTHBUSTERS** kicks off all-new episodes on a brand-new night – Sundays at 9PM ET/PT – with a one-hour duct tape extravaganza. Duct tape has been a **MYTHBUSTERS** staple, but it's never been put to the test like this! In the March 25 episode, Adam and Jamie get abandoned on a deserted island, armed with nothing but the sticky silver adhesive. Can they use it to source water, find food, build shelter, and even escape? **MYTHBUSTERS**, which first launched on Discovery Channel in 2003, is hosted by Jamie Hyneman and Adam Savage, and Tory Belleci, Kari Byron and Grant Imahara. Inspiring a generation to inquire, interact and get involved with science, **MYTHBUSTERS** uses a signature brand of explosive experimentation to prove or disprove popular myths, misconceptions or legends.

Additional Spring 2012 myths will include:

- A highly controversial myth: the “battle of the sexes” to find out who’s better at navigating, grilling, loading a car, reading non-verbal cues and, of course, driving.
- The guys literally reinvent the wheel to find out if you can ever get a smooth ride in a car that has square wheels.
- In the movie *Date Night*, two cars have a fender bender with a difference: instead of crumpling, they become conjoined, leading to a crazy car chase sequence. But could two hooked-together cars really drive as one?
- Replicating a viral video, the MYTHBUSTERS find out what really happens when the mother of all flamethrowers faces off in a duel with the mother of all fire extinguishers.
- Can a dust cloud created by a foursome of 4x4 really blind the all-seeing eye of the latest military hardware?
- Is it possible to construct a rocket powered go-cart that won’t blow up its rider?
- Adam and Jamie find out if driving in stilettos can really make you a hazard behind the wheel.
- Could someone survive jumping off a building wrapped in bubble packaging?
- Can you really use a rocket-powered ejector seat to flip an upside down sports car a la James Bond?
